

Q1. The human body is the entire structure of ____.

Ans- **A human being.**

Q2. It is composed of many different types of ____.

Ans- **Cells.**

Q3. The study of the human body ____.

Ans- **Involves anatomy, physiology, histology, embryology.**

Q4. The human body is composed of elements including ____.

Ans- **Hydrogen, oxygen, carbon, calcium, and phosphorus.**

Q5. The largest organ in the human body?

Ans- **Skin.**

Q6. What is the largest gland in the human body?

Ans- **Liver.**

Q7. How many blood groups in the (ABO) system?

Ans- **4.**

Q8. The weight of the brain?

Ans- **1.36kg.**

Q9. How many chambers in the human heart?

Ans- **4 Chambers.**

Q10. Total Number of Muscles in the human body?

Ans- **640.**

Q11. Which gland is called as master gland?

Ans- **Pituitary gland.**

Q12. The contractile proteins in a muscle are-

Ans- **Actin, and Myosin.**

Q13. In the human body, nails are made up of.

Ans- **keratin.**

Q14. The number of Spinal Nerves in the Human body?

Ans- **31 Pairs.**

Q15. A total number of bones in the human body?

Ans- **206.**

Q16.The hardest bone in the Human body?

Ans- **Femur.**

Q17. What is the ph of Bile?

Ans- **7.5**

Q18. Blood cell production occurs in Which system?

Ans- **Skeletal System.**

Q19. What is the pH value of Human blood

Ans- **7.4**

Q20.DNA sits within the___of a cell.

Ans- **Nucleus.**
