

11. In which of the following reactions occur at cathode?

- |  |  |
|--|--|
| <u>A.</u> $\text{Cu}^{2+} + 2\text{e}^- \rightarrow \text{Cu}$ | <u>B.</u> $\text{Cu} + 2\text{e}^- \rightarrow \text{Cu}^{2+}$ |
| <u>C.</u> $\text{Hg} + \text{O}_2 \rightarrow \text{HgO}$      | <u>D.</u> $\text{Mg} + \text{O}_2 \rightarrow \text{MgO}$      |

**Answer:** Option A

12. Electricity in voltaic cell is produced due to

- |                          |                      |
|--------------------------|----------------------|
| <u>A.</u> neutralization | <u>B.</u> oxidation  |
| <u>C.</u> reduction      | <u>D.</u> both b & c |

13. In electrolytic solution conductance of electricity is due to

- |                          |                      |
|--------------------------|----------------------|
| <u>A.</u> free electrons | <u>B.</u> ions       |
| <u>C.</u> metals         | <u>D.</u> electrodes |

**Answer:** Option B

14. In electrolytic cell electricity carries

- |                                |                                    |
|--------------------------------|------------------------------------|
| <u>A.</u> spontaneous reaction | <u>B.</u> non-spontaneous reaction |
| <u>C.</u> neutralization       | <u>D.</u> all of above             |

**Answer:** Option B

15. Reaction at anode is called

- |                     |                         |
|---------------------|-------------------------|
| <u>A.</u> oxidation | <u>B.</u> reduction     |
| <u>C.</u> redox     | <u>D.</u> decomposition |

**Answer:** Option A

16. In an electrolytic cell cathode provides electrons to

- |                        |   |
|------------------------|---|
| <u>A.</u> ve ion       | <u>B.</u> ?ve ion                       |
| <u>C.</u> neutral atom | <u>D.</u> does not provide any electron |

**Answer:** Option A

---

17. In Galvanic cell electrons flow from anode to cathode through

- |                              |                     |
|------------------------------|---------------------|
| A. external electric circuit | B. salt bridge      |
| C. movement of ions          | D. all of the above |

**Answer:** Option A

---

18. Decrease in oxidation number is called

- |                        |                                       |
|------------------------|---------------------------------------|
| A. oxidation           | B. reduction                          |
| C. oxidation-reduction | D. all of above represent same entity |

**Answer:** Option B

---

19. For the measurement of standard electrode potential Zn is dipped in

- |                                     |                                     |
|-------------------------------------|-------------------------------------|
| A. 1 M ZnO solution                 | B. 1 M ZnSO <sub>4</sub> solution   |
| C. 1.5 M ZnSO <sub>4</sub> solution | D. 0.1 M ZnSO <sub>4</sub> solution |

**Answer:** Option B

---

20. Right half cell contains \_\_\_\_\_ electrode

- |       |       |
|-------|-------|
| A. Al | B. Zn |
| C. Cu | D. Fe |

**Answer:** Option C
