

21. Which of the elements show passivity when treated with conc. HNO<sub>3</sub>.

- |              |                            |
|--------------|----------------------------|
| <u>A.</u> Fe | <u>B.</u> A?               |
| <u>C.</u> Cr | <u>D.</u> All of the above |

**Answer:** Option D

---

22. Which allotropic form of phosphorous is the most stable?

- |                 |                  |
|-----------------|------------------|
| <u>A.</u> White | <u>B.</u> black  |
| <u>C.</u> red   | <u>D.</u> Violet |

**Answer:** Option B

---

23. The gas which cannot be dried by conc. H<sub>2</sub>SO<sub>4</sub>

- |                           |   |
|---------------------------|---|
| <u>A.</u> SO <sub>2</sub> | <u>B.</u> H <sub>2</sub> S              |
| <u>C.</u> CO <sub>2</sub> | <u>D.</u> C <sub>2</sub> H <sub>4</sub> |

**Answer:** Option B

---

24. The chemical composition of cinnabar is

- |               |               |
|---------------|---------------|
| <u>A.</u> ZnS | <u>B.</u> PbS |
| <u>C.</u> HgS | <u>D.</u> FeS |

**Answer:** Option C

---

25. FeSO<sub>4</sub> forms brown ring with

- |   |                            |
|---|----------------------------|
| <u>A.</u> N <sub>2</sub> O <sub>3</sub> | <u>B.</u> NO <sub>2</sub>  |
| <u>C.</u> NO                            | <u>D.</u> N <sub>2</sub> O |

**Answer:** Option C

---

26. Oxygen and sulphur resemble in all except

- A. Electronic configuration of valence shell electrons      B. Show allotropy  
C. Polymeric      D. Show same oxidation state

**Answer:** Option D

---

27. Oxygen does not react with all except

- A. Alkali      B. Acid  
C. Water      D. Metals

**Answer:** Option D

---

28. Arsenic oxides are removed by passing through

- A. Ferric hydroxide      B. Sodium hydroxide  
C. Calcium hydroxide      D. Aluminium hydroxide

**Answer:** Option A

---

29. In which compound nitrogen has maximum oxidation state

- A. N<sub>2</sub>O      B. NO<sub>2</sub>  
C. HNO<sub>2</sub>      D. HNO<sub>3</sub>

**Answer:** Option D

---

30. When sulphuric acid is treated with ethanol sulphuric acid behaves like

- A. an acid      B. a dehydrating agent  
C. an oxidizing agent      D. as sulphonating agent

**Answer:** Option B
