

Q21. The chemical effect of current is used in

- D.C. ammeter hour meter
- D.D. ammeter
- D.C. energy meter
- none f the above

Ans. 1

Q22. In majority of instruments, damping is provided by

- fluid friction
- spring
- eddy currents
- all of the above

Ans. 3

Q23. An ammeter is a instrument.

- secondary instrument
- absolute instrument
- recording instrument
- integrating instrument

Ans. 1

Q24. The switchboard instruments should be mounted in position.

- vertical
- horizontal
- either 1 or 2
- neither 1 nor 2

Ans. 1

Q25. The function of shunt in an ammeter is to

- by pass the current
- increase the sensitivity of the ammeter
- increase the resistance of ammeter
- none of the above

Ans. 1

Q26. The multiplier and the meter-coil in a voltmeter are in

- series
- parallel
- series-parallel
- none of the above

Ans. 1

Q27. A moving iron instrument can be used for

- D.C. only
 - A.C. only
 - both D.C. and A.C.
 - none of the above
- Ans. 3

Q28. The scale of a rectifier instrument is

- linear
 - non-linear
 - either 1 or 2
 - neither 1 nor 2
- Ans. 1

Q29. To measure current at high frequency, we must use

- moving iron instrument
 - electrostatic instrument
 - thermocouple instrument
 - none of the above
- Ans. 3

Q30. The resistance in the circuit of the moving coil of a dynamometer should be

- zero
 - low
 - high
 - none of the above
- Ans. 3
