

Biggest, Highest, Largest, Longest in World : Periodic Table

Lightest metal - Lithium (density 0.53 gm/cc)

Heaviest metal - Osmium (density 22.59 gm/cc)

Metal having highest melting point - Tungsten, 3410°C.

Metal with lowest melting point - Mercury (-37° C)

Metal with highest boiling point - Tungsten, 5660°C

Metal with lowest boiling point - Mercury (356.7° C)
