

41. Temperature of core could be:

- A. 4000
- B. 5000
- C. 6000
- D. None of these

**Answer & Explanation**

**Answer:** Option A

---

42. Just beneath the rigid lithosphere a soft layer of upper mantle is called:

- A. Berysphere
- B. Mesosphere
- C. Asthenosphere
- D. None of these

**Answer & Explanation**

**Answer:** Option C

---

43. Two parts of the crust are:

- A. Mountainous crust and oceanic crust
- B. Mountainous crust and continental crust
- C. Continental crust and oceanic crust
- D. None of these

**Answer & Explanation**

**Answer:** Option C

---

44. Earth flows normally take place:

- A. In humid regions
- B. In cool regions
- C. Both (a) & (b)
- D. None of these

**Answer & Explanation**

**Answer:** Option A

---

45. When material breaks away due to earth flow it normally leaves:

- A. Cliff
- B. Scar or hill top
- C. Canyon
- D. None of these

**Answer & Explanation**

**Answer:** Option B

---

46. Inner core of the earth contains:

- A. Iron and Magnesium
- B. Iron and Nickel
- C. Silicon and Iron
- D. None of these

**Answer & Explanation**

**Answer:** Option B

---

47. The interior layer of the earth which is subjected to great heat and pressure is known technically as the barysphere. Which part of the earth does it refer to:

- A. Upper Mantle
- B. Asthenosphere
- C. Hydrosphere
- D. The Core

**Answer & Explanation**

**Answer:** Option D

**Explanation:**
