Read the Poem and answer the questions. (Q.No: 81 to 87)

A Poison Tree

I was angry with my friend;  
I told my wrath, my wrath did end.  
I was angry with my foe:  
I told it not, my wrath did grow.

And I waterd it in fears,  
Night & morning with my tears:  
And I sunned it with smiles,  
And with soft deceitful wiles.

And it grew both day and night.  
Till it bore an apple bright.  
And my foe beheld it shine,  
And he knew that it was mine.

And into my garden stole,  
When the night had veild the pole;  
In the morning glad I see;  
My foe outstretched beneath the tree.

### Silk Road

The Silk Road was a network of Eurasian trade routes active from the second century BCE until the mid-15th century. Spanning over 6,400 kilometers, it was an intricate web of land and sea East and Southeast Asia, the Indian subcontinent, Central Asia, the Middle East, East Africa and Europe. The Silk Road derives its name from the highly lucrative trade of silk textiles that were produced almost exclusively in China. The network began with the Han dynasty's expansion into Central Asia around 114 BCE. By the early first century CE, Chinese silk was widely sought-after in Rome, Egypt, and Greece. Other lucrative commodities from the East included tea, dyes, perfumes, and porcelain; among Western exports were horses, camels, honey, wine, and gold. During its roughly 1,500 years of existence, the Silk Road endured the rise and fall of numerous empires and several major calamities such as the Black Death and the Mongol conquests. As a highly decentralized network, security was sparse, and travellers faced the constant threats of banditry and nomadic raiders, in addition to long expanses of often inhospitable terrain. In addition to goods, the network facilitated an unprecedented exchange of ideas, religions (especially Buddhism), philosophies, and scientific discoveries. Likewise, a wide variety of people utilized the routes, including migrants, refugees, missionaries, artisans, diplomats, and soldiers. Diseases such as plague also spread along the Silk Road, possibly contributing to the Black Death. The Silk Road abruptly ended with the rise of the Ottoman Empire in 1453. This prompted European efforts to seek alternative routes to Eastern riches, thereby ushering the Age of Discovery and European colonialism.
