Case Study - 12 to 16

Directions: Read the passage carefully and answer the questions that follow.

The Brihanmumbai Municipal Corporation (BMC) on Wednesday declared a 10 per cent water cut across the city for residential, commercial and industrial purposes as well. The water cut would be in place with immediate effect, from November 15, after the civic chief approved the cut. This announcement comes in the backdrop of deficient rainfall that led to a less-than-adequate water stock in the dams and lakes that supply water to Mumbai. As of November 14, the civic body needs water for 278 days till the onset of the next monsoon, but currently has water for only 254 days.

The seven lakes supplying potable water to the city have received 8 per cent less water than last year and so the civic body was likely to impose water cuts. The information about the imposition of the water cut was given to the civic standing committee in its meeting on Wednesday but no discussion was held as the meeting was **adjourned** owing to the death of union minister Ananth Kumar.

Case Study - 71 to 75**Directions: Read the passage carefully and answer the questions that follow.**

Farmers in Kerala have been facing great economic loss due to loss in life and reduction in milk yield due to Foot and mouth Disease every year. Besides this the State incurred large economic losses as a result of the inability to produce and ship processed animal products. It was estimated that the country is losing over Rs 4000 Crore annually due to FMD.

Since the State does not have the economic resources to implement a large scale disease control project on its own, it was decided to approach an external agency such as National Dairy Development Board to provide infrastructural and monetary support. Consequent to a series of discussions at Government level, NDDB agreed in principle to launch a joint venture programme to **suppress** Foot and Mouth Disease in the state.

Case Study - 77 to 81

Directions: Read the passage carefully and answer the questions that follow.

For Binny Bansal, the end of his long run as co-founder of India's most successful start-up came Saturday when he began calling colleagues to say he was done. The 37-year-old was stunned that officials from Walmart Inc., his start-up's new owner, were probing details of an affair years earlier. An investigation found no evidence of wrongdoing. Nevertheless, a decade after he created e-commerce leader Flipkart, he was calling to say goodbye.

His ouster, announced Tuesday from Walmart's hometown of Bentonville, Ark., left workers at Flipkart, half a world away in Bangalore, stunned and struggling to make sense of the cryptic explanation. They worried about Walmart's motivations and wondered if other Flipkart leaders would exit.

Question No.20

B

In this question, a passage is given followed by a statement. Read the passage carefully and judge the statement based on the given passage.

The current Australia cricket team has lost three of the last five Test series it has played. It has lost the last two series it has played, one of them against Pakistan, hardly a powerhouse of the current game. Australia is enfeebled by the absence of their two best batsmen, Steve Smith and David Warner, both serving suspensions.

The game itself is at a crossroads in Australia, with feverish introspection and hand wringing about the manner in which the national team plays the game, the aggression it displays on the field, the lack of respect it shows rivals, and the way in which it ignores the means to achieve the sole, coveted end of winning. Australian cricket has seldom been at such a low ebb. Now is the best time to beat them in their backyard. Put another way, if India cannot beat Australia in Australia in this series, it will show that the hype around this team is simply that: hype.

Statement: The current Australia cricket team has won two of the last five Test series it has played.

Question No.31

In this question, a passage is given followed by a statement. Read the passage carefully and judge the statement based on the given passage.

When Shah Jahan eternalised his love for Mumtaz, he must have believed that the river would be flowing forever. There was no solid ground on which the foundation could be built. So they used a well foundation, an engineering practice using deep wells to lower the water table and filling them with rocks and mortar. Finally they were capped with wooden, boxlike structures on which the mausoleum was constructed.

The Yamuna is an integral part of the Taj's design and there was no anticipation that it would dry or become narrow. But the river has narrowed and it is polluted. The wooden foundations are likely to become brittle and might disintegrate because, as Venice, built on a wooden foundation, shows, longevity of wood increases when it is submerged in water. When the wood is not exposed to oxygen there are no microorganisms to promote decay. A dry Yamuna could promote disintegration of the wooden foundations, the corrosive effect of the polluted water adding to the decay.

Statement: Taj Mahal was built on a strong solid ground on the bank of river Yamuna.
