- A) He boils down his anger on her.
- B) It boils down to a simple solution.
- C) The water boils down so that he can make tea.
- D) The boiling of can cause serious problems.

Read the below passage and answer the questions that follow:

In speaking today about the social responsibilities of science, I will speak of things which are relatively easy for young people, but difficult for older persons to understand. This is because young people possess a quality that, in general, diminishes with years: the quality of imagination. Imagination is an integral part of science, and naturally endowed to young people. For the last three centuries the findings of science have had marked impact upon society, but people on the whole have not understood just how the world has been affected. From the time of Newton, men began to realize that through technology, which is based upon the findings of science, substantial comforts and profits could be gained. From the time of Pasteur, men began to realize that through the application of science to medicine, they might be able to live longer. As years went by, technological materialism was developed; demands for new technological knowledge became greater and greater; more and more men became scientists and technologists. In the valour of its ignorance, humanity accepted science and technology as its benefactors, seldom questioning, seldom asking where it was leading.

4) Why is imagination a quality possessed more by young people?

- A) Young people are more intelligent
- B) It is a quality that diminishes with years
- C) Older people have a rigid attitude
- D) The older generation has conservative views

5) According to the passage, how did Pasteur apply science to medicine?

- A) He is considered the father of microbiology
- B) He was the head of the Pasteur Institute
- C) He was known for conducting scientific experiments
- D) Men realised that they might be able to live longer.

6) Which of the following best explains the term 'technological materialism'?

- A) The advancement of technology has made man more materialistic
- B) Mankind has become dependent on technology
- C) The use of modern gadgets has increased
- D) Modern society requires more and more products
