A conversation which is amusing and not serious is a/an

- A) joyless
- B) hectic
- C) immoderate
- D) banter

Read the below passage and answer the questions that follow:

The Maharaja's minions, as the word suggests, were subservient and sycophantic. In order to keep him in good humour, they fell in with his plans to kill the tigers. Not even his Dewan, who should have been his advisor dared to go against his wishes, but aided his marriage to a princess whose father's kingdom boasted of a tiger population. When the hundredth tiger could not be found, the king's Dewan went to the extent of planting a caged tiger in a strategic place for the king to find and shoot. When the king missed his mark the minions saw to it that the tiger was shot and buried. Not one of them wanted to incur his wrath by revealing the truth or by acting in contradiction to his wishes. Even the shopkeeper who sold the king the toy tiger quoted a higher price lest he be punished under the rules of the Emergency. It is evident that the king's minions were driven by fear rather than feelings of sincerity towards their ruler. They were all aware that their jobs were at stake. This sort of behaviour indeed finds a reflection in today's political order, where the greater good is sacrificed at the altar of selfish personal ambitions and gains.

Read the below passage carefully and answer the questions that follow.

ON A FRIGID AFTERNOON in February 2012, a pair of hunters stalking sika deer along the Krounovka River in Russia's remote Primorsky province were halted by an unusual sight: a four-month-old Amur tiger cub lying on her side in the snow. Her eyes were glazed and distant, her breathing shallow. The cat clearly had not eaten in days, and the tip of her tail was black with frostbite. The hunters carted her to the home of Andrey Oryol, a local wildlife inspector.

Oryol made an enclosure for the tiger who was eventually given the name Zolushka, and fed her meat, eggs and warm milk. After a few days, the tiger cub's vitals has stabilized; after two weeks, she was pacing restlessly. Heartened, Oryol reached out to Dale Miquelle, the director of the Russia Program of the wildlife Conservation Society (WCS), an American non-profit. Miquelle arrived at Oryol's house with Sasha Rybin, a WCS colleague. Immediately, Zolushka began to snarl. Adolescent tigers, despite their relatively small stature-Zolushka was about the size of a golden retriever-are dangerous animals, with sharp claws and teeth. Miquelle used a stick to distract her while Rybin jabbed her with a tranquilizer dart. Once she had collapsed, a pair of local veterinarians amputated the necrotic tip of her tail. Bandaged and sedated, Zolushka was moved to the center for the Rehabilitation and Reintroduction of Tigers and other Rare Animals, some 65 kilometers to the south in Alekseevka.

Opened months earlier by a coalition that included the Russian Geographical Society and the government-funded group Inspection Tiger, the Alekseevka centre spilled over eight acres thick with brush and vegetation. "There were two main goals," Miquelle recalled. "Don't let the animal get acclimated to humans. And teach her to hunt."

If Orphaned cubs could be rehabilitated to the point of mating with wild tigers, they would not only provide a boost in the local population but, in the aggregate, perhaps reclaim regions that hadn't seen healthy tiger communities in decades. Beyond that, the hope was to establish a model

that scientists in other countries could perhaps one day duplicate.

Zolushka was the first tiger to arrive at Alekseevka. In the early months she was fed primarily meat, dumped into the enclosure through one of the slots in the fencing. In the summer of 2012 Zolushka was presented with rabbits-fast, but ultimately defenceless. The next step was wild boar. It seemed at first to confuse her. "It was like a kid trying to figure out a puzzle," says Miquelle.

In May 2013, a little more than a year after she arrived at the Alekseevka centre, the decision was made to set Zolushka free.
