Q2790384 Read the following passage and answer the questions given below:

There is no denying that India has made considerable improvement in education enrolment in recent years, almost reaching the goal of universal access to schooling. But learning outcomes continue to be poor. According to the ASER (Rural) report 2018, only 50.3% of Class V children can read a Class II level text. This shows a high degree of what the World Bank defines as learning poverty – being unable to read and understand a simple age-appropriate text by age 10.

If a child cannot read age-appropriate text his or her learning curve is likely to plateau, as he or she will be unable to move on from identifying words to grasping subject concepts. Put another way, all later schooling becomes a waste. And it is generally agreed that the inflection point is Class III. Countries which have prioritized and invested in foundational learning have produced a better quality of workforce, enabling their economies to take off. Both South Korea and China did this in the 1970s, and the impact on their economies was tremendous.

Therefore, India would do well to shift the focus onto foundational learning. And getting age-appropriate reading right by Class III is a simple, quantifiable metric that can be implemented across the education landscape. As government rolls out a new National Education Policy, it would do well to code in foundational learning and oral reading fluency. Like Swachh Bharat, the government must accord the highest priority to this goal.

Q2791480 Read the following passage and answer the questions based on the information provided in the passage.

A five-judge Constitution Bench of the Supreme Court has struck down the 99th Constitutional Amendment Act and the National Judicial Appointments Commission (NJAC) Act 2014 as unconstitutional and void. The amendment was brought to replace the collegium system of appointment of judges. Ordering the revival of the collegium system which allowed judges to appoint new judges, the Bench rejected the government's plea to refer the case to a larger Bench. The apex court has simultaneously invited suggestions to improve the collegium system, fixing November 3 for its hearing on the matter. The broader judicial message is clear. As senior lawyer Harish Salve put it, [The] SC is giving a message that the power is with them. Attorney General Mukul Rohatgi called it a judgment against the will of the Parliament, half the state legislatures and the will of the people. The NJAC was indeed enacted after a broad political consensus which evolved after several commissions and parliamentary committees found flaws in the collegium system over the years. It was ratified by Parliament as well as 20 state legislatures. This is why a senior advocate like K. T. S. Tulsi, while expressing disappointment over the judgment, quoted parliamentarians talking of the tyranny of the unelected over the elected. This paper has argued in favour of NJAC because it promised to end opacity in judicial appointments. Judges do not have unbridled power to appoint judges in most other liberal democracies. For example, the US Supreme Court judges are appointed by the president and ratified by the Senate. The Constitution envisages separation of powers between legislature, executive and legislature which means each branch of government should stay within its own remit. Under NJAC the commission to select judges is composed equally of judges and non-judges, which should prevent power vesting exclusively with either judges or the political class. (Adapted from an editorial published in The Times of India on October 17, 2015.)
