-

Q2860202 Change the voice of the following sentence: The builder built their homes with boulders for a facade.

Score Obtained : 1.0 / 1.0

- A) Building the home with boulders for a facade was being done by the builder.
- B) The builder their homes with boulders he built for a facade.
- C) For a facade, the builder their homes with boulders built.
- D) Their homes were built by the builder with boulders for a facade.**

Q2860095 Read the passage carefully and answer the questions given below it:

Among predatory dinosaurs, few flesh-eaters were bigger, faster and nastier than the "tyrant lizard" of popular imagination, the Tyrannosaurus Rex. At least, that is what we have been led to believe.

Now research suggests that, far from being the Ferrari of dinosaurs, Tyrannosaurus Rex, whose ferocious reputation has fascinated generations of schoolchildren, was in fact a cumbersome creature with a usual running speed of twenty-five kilometres an hour. This is a mere snail's pace compared with modern animals such as the cheetah.

Unlike some of the predators of today's African savannah, which can change direction almost immediately, the dinosaur would have had to turn slowly or risk tumbling over. And while a human can spin forty-five degrees in a twentieth of a second, a Tyrannosaurus would have taken as much as two seconds, as it would have been hampered by its long tail. Thankfully, however, all its prey, such as triceratops, would have been afflicted with the same lack of speed and agility.

The findings were reached after researchers used computer modelling and biomechanical calculations to work out the dinosaur's speed, agility and weight. They based their calculations on measurements taken from a fossil dinosaur representative of an average Tyrannosaurus and concluded the creatures probably weighed between six and eight tonnes.

Calculations of the leg muscles suggest that the animal would have had a top speed of forty kilometres an hour, which is nothing compared to a cheetah's one hundred kilometres an hour. It is sobering to reflect, though, that an Olympic sprinter runs at about thirty-five kilometres an hour, not sufficient to outrun a Tyrannosaurus, should Man have been around at that time!

Q2860100 What did scientists consider when calculating the speed and agility of the Tyrannosaurus?

- A. The examination of fossils
- B. Computer models and biomechanical calculations
- C. Comparisons with other animals
- D. Comparison with other ages

Score Obtained : 1.0 / 1.0

- A) A&D
- B) A&B**
- C) C&D
- D) B&C

Q2860098 What made it difficult for the Tyrannosaurus to turn?

- A) Its huge leg muscles
- B) Its weight

Score Obtained : 1.0 / 1.0

- C)** The length of its tail
 - D) Its overall size
-

Q2860097 What is another word for 'cumbersome' as used in the passage?

Score Obtained : -0

Q2859213 Why do most loudspeakers have drives mounted inside some cabinets?

Score Obtained : 1.0 / 1.0

- A) To allow constructive interference
B) To prevent unnecessary outside sound from interfering
C) To protect the speakers from damage
D) To prevent destructive interference
-

Q2858945 Carbon and oxygen atoms react to form carbon dioxide by

Score Obtained : -0.25 / 1.0

- A) Sharing electrons**
B) Gaining electrons only
C) Losing and gaining electrons
D) Losing electrons only
-

Q2858933 Why does kitchen LPG gas sometimes burn with yellow flame?

Score Obtained : 1.0 / 1.0

- A) Incomplete combustion of the LPG gas**
B) High temperature
C) Complete combustion of the LPG gas
D) Ionization of gas
-

Q2859196 The higher the altitude, the more slowly windmills rotate at the same wind speed. Which of the following is the most appropriate reason why the blades of windmills rotate more slowly in regions of higher altitude at the same wind speed?

Score Obtained : 1.0 / 1.0

- A) The gravity increases as the altitude increases
B) The temperature increases as the altitude increases
C) It rains more often as the altitude increases
D) The air becomes less dense as altitude increases

Q2859066 Nipah virus infection in humans causes a range of clinical presentations, from asymptomatic infection (subclinical) to acute respiratory infection and fatal encephalitis. The natural host of the Nipah virus (NiV) is

Score Obtained : 1.0

- A) Fruit bat
 - B) Mosquitoes
 - C) Frog
 - D) Chimpanzee
-

Q2858912 Detergents can be made biodegradable by:

Score Obtained : 1.0

- A) Adding phosphate linkage to them
 - B) Converting the hydrocarbon part more aromatic
 - C) Converting the hydrocarbon part less branched and straight chain
 - D) Converting the hydrocarbon part more branched
-

Q2859065 An animal that eats food from both plants and animals is

Score Obtained : 1.0

- A) Omnivore
 - B) Carnivore
 - C) Producer
 - D) Herbivore
-

Q2859183 The potential difference across a capacitor is doubled. What is the multiplication factor by which the energy stored in it will change?

Score Obtained : 1.0

- A) 2
 - B) 3
 - C) 4
 - D) 1
-

Q2859072 The energy currency for most of the cellular processes like conduction of nervous impulses and protein synthesis is

Score Obtained : 1.0

- A) ATP
- B) Protein

D) Fats

Q2859180 Light exhibits dual property - wave and particle. Which of the following explains the wave nature of light?

Score Obtained : 1.0 / 1.0

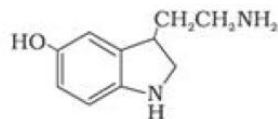

- A)** Huygen's Principle
B) Photoelectric Effect
C) Heisenberg's Principle
D) Kaiser Effect

Q2859075 Match the following glands given in SET I with their respective hormones given SET II

SET I:	SET II:
(i) Pituitary	(a) Insulin
(ii) Thyroid gland	(b) Growth hormone
(iii) Pancreas	(c) Thyroxine

Score Obtained : 1.0 / 1.0

- A)** (i)-(b), (ii)-(c), (iii)-(a)
B) (i)-(c), (ii)-(b), (iii)-(a)
C) (i)-(b), (ii)-(a), (iii)-(c)
D) (i)-(a), (ii)-(b), (iii)-(c)

Q2858915 The common name of the following drug molecule is

Score Obtained : 0.0 / 1.0

- A) Heroin
B) Ranitidine
C) Serotonin
D) Phenelzine

Q2858929 Why is HNO₃ called aqua fortis?

- A) It cannot dissolve any metal
 - B) It can dissolve most metals**
 - C) It can dissolve only gold
 - D) It can dissolve only platinum
-

Q2859173 Graphite and Diamond are the

- A) isotopes of Carbon
 - B) isotones of Carbon
 - C) isomers of Carbon
 - D) allotropes of Carbon**
-

Q2859083 The male reproductive part in a human being that produces sperms is

- A) scrotum
 - B) uterus
 - C) testis**
 - D) oviduct
-
