Q2860101 Read the passage carefully and answer the questions given below it:

There is much disagreement as to whether non-human animals have rights, and what is meant by animal rights. Animal rights teach us that certain things are wrong as a matter of principle, that there are some things that are morally wrong to do to animals. It makes no difference if the animals are given 5-star treatment throughout their lives and then killed humanely without any fear or pain.

Every day in countries around the world, animals are fighting for their lives. They are enslaved, beaten, and kept in chains to make them perform for humans' 'entertainment'; they are mutilated and confined to tiny cages so that we can kill them and eat them; they are burned, blinded, poisoned, and cut up alive in the name of 'science'; they are electrocuted, strangled, and skinned

alive so that people can parade around in their coats..

The abuse that animals suffer at human hands is heart-breaking, sickening and infuriating. It's even more so when we realize that the everyday choices we make—such as what we eat for lunch and the kind of shampoo we buy—may be directly supporting some of this abuse. But as hard as it is to think about, we can't stop animals' suffering if we simply look the other way and pretend it isn't happening.

Human beings and non-human animals have rights because they are both 'subjects-of-a-life'.

- ◆ They have similar levels of biological complexity
- ◆ They are conscious and aware that they exist
- ◆ They know what is happening to them
- ◆ They prefer some things and dislike others
- ◆ They make conscious choices
- ◆ They live in such a way as to give themselves the best quality of life
- ◆ They plan their lives to some extent
- ◆ The quality and length of their life matters to them

If a being is the subject-of-a-life, then it can be said to have 'inherent value'. All beings with inherent value are equally valuable and entitled to the same rights.

Their inherent value doesn't depend on how useful they are to the world, and it doesn't diminish if they are a burden to others. Thus, non-human animals have rights in just the same way, for the same reasons, and to the same extent that human beings have rights.

Q2860104 What can we do to stop supporting animal abuse?

Score Obtained : -0.25 / 1.0

- A) Familiarize oneself with animal rights issues.
- B) Turn a blind eye to what is happening.
- C) Live in denial and say that it's not happening
- D) Consider the choices we make everyday.

Q2860106 Which of the following is not one of the reasons the author offers to make an animal the subject of a life?
