A well-known mythical creature is the yeti. For fifty years the snowy wastes of the Himalayas have beckoned intrepid explorers in search of the mysterious animal also known as 'the abominable snowman'. Occasional sightings of large hairy creatures walking on two legs across the snows or in the forested valleys of Nepal and Tibet have kept the legend alive. Conclusive evidence of the creature's existence has proven elusive, however. The picture of a large, wide footprint, taken by Sir Edmund Hillary in 1951 while climbing Mount Everest, proves nothing.

Since that time a number of yeti 'relics' have turned up. In 1960, western visitors to a Nepalese monastery were astonished to find monks using a 'yeti scalp' in some of their rituals. Analysis of the red hairs, however, showed that they had originated from a mountain goat. A different monastery presented a severed hand, obviously from a primate, as evidence that some kind of ape man was still wandering the mountain fortresses of the Himalayas. The hand could, of course, have come from anywhere – and it vanished in 1991. Finally, there have been rumours, started by travellers, of huge mummified bodies of yeti preserved in even more remote monasteries. These turned out to be fakes or were no longer where they were supposed to be. However, belief in the existence of the 'wild man of the snows' is still real enough among the locals. What could account for this?

A popular theory among zoologists is that the idea of the yeti is based upon handed-down memories of apes, possibly orang-utans, which may have lived in the mountain forests of this region in the distant past. Some argue that a few of these apes still survive in small numbers, just occasionally spotted crossing a snowfield from one valley to another. Reinhold Messner, one of the world's foremost mountaineers, believes that the legend is based upon a real but little-known animal that inhabited the forests of eastern Tibet. This was the area the Sherpas once lived in before migrating to present-day Nepal, so they may have taken with them their traditional stories.
