 C) It should be ensured by a teacher that the students practise the correct usage of grammar.  
 D) A teacher should ensure the correct usage of grammar by the students.

Q2895574 A 13 year old study of early childhood development at Harvard University has shown that, by the age of three, most children have the potential to understand about 1000 words- most of the language they will use in ordinary conversation for the rest of their lives. Furthermore, research has shown that while every child is born with a natural curiosity, it can be suppressed dramatically during the second and third years of life. Researchers claim that the human personality is formed during the first two years of life and during the first three years children learn the basic skills they will use in all their later learning both at home and at school. Once over the age of three, children continue to expand on existing knowledge of the world. It is generally acknowledged that young people from poorer socio-economic backgrounds tend to do less well in our education system. That's observed in many countries like Australia, Britain, and America and New Zealand. In an attempt to overcome that educational under-achievement, a nationwide program called "Head start" was launched in the United States in 1965. A lot of money was poured into it. It took children into pre-school institutions at the age of three and was supposed to help the children of poorer families succeed in school. Despite substantial funding results have been disappointing. It is thought that there are two explanations for this. First, the program began too late. Many children who entered it at the age of three were already behind their peers in language and measurable intelligence. Second, the parents were not involved. At the end of each day, "Head start" children returned to the same disadvantaged home environment.

Q2895579 Identify the synonym of "disadvantaged".

Score Obtained : 1.0 / 1.0

- A) Good fortune  
 B) Deprived  
 C) Well assisted  
 D) Privileged

Q2895576 What is the reason offered for the poor performance in education?

Score Obtained : 1.0 / 1.0

- A) Lack of interest in education  
 B) Lack of learning resources  
 C) Poorer socio -economic background  
 D) Lack of government initiative towards education

Q2895577 According to the researchers what is formed during the first two years of a child's life?

Score Obtained : 1.0 / 1.0

- A) Human personality  
 B) Intelligence  
 C) Physical growth  
 D) Over development of the skills

Q2895575 What is a significant development in children by the time they reach the age of three?

Score Obtained : 1.0 / 1.0

- A) They can speak very fluently  
 B) They can understand and use around 1000 words  
 C) They understand many words  
 D) They are too small to understand words

Q2895578 Was the program "Head start", launched to overcome educational under achievement, useful?

Score Obtained : 1.0 / 1.0

- A) The results were disappointing  
 B) It was a huge success  
 C) It helped children to learn well and fast  
 D) Children overcame the disadvantages of their home environment
