Q2895556 It is not an infrequent thing for a young man to decide his future on the toss of a coin, to make choice in this way between two professions, to decide whether he shall stay at home or emigrate, or whether he shall accept this or that appointment. Most boys have to earn their living some day or other, and it is of vital importance that they should choose that type of work which they can do best. For those who have a decided bent there is little or no difficulty, except that they should consult their parents and friends in order that they may know what kind of a market there will be for their work. Others who evince no particular learning should exercise greater care, in order that they may find out what they can do best, and what is likely to be remunerative. Too often men find themselves burdened with a profession into which they cannot put their whole heart, or which, from overcrowding or other causes, will not bring them in sufficient for a decent livelihood, and bitterly they repent the hastiness or carelessness of their youth.

Q2895559 Men repent bitterly -
