English Language - English Language

Case Study - 1 to 5 — 12.50

Directions: Read the short passage below and answer the questions that follow.
Python is an interpreted, object-oriented, high-level programming language with dynamic semantics. Its high-level built-in data structures, combined with dynamic typing and dynamic binding, make it very attractive for Rapid Application Development, as well as for use as a scripting or glue language - Glue language refers to a programming language that is designed specifically to write and manage program and code, which connects together different software components- to connect existing components together. Python's simple, easy to learn syntax emphasises readability and therefore reduces the cost of program maintenance. Python supports modules and packages, which encourages program modularity and code reuse. The Python interpreter and the extensive standard library are available in source or binary form without charge for all major platforms, and can be freely distributed. Often, programmers fall in love with Python because of the increased productivity it provides. Since there is no compilation step, the edit-test-debug cycle is incredibly fast. Debugging Python programs is easy: a bug or bad input will never cause a segmentation fault. Instead, when the interpreter discovers an error, it raises an exception. When the program doesn't catch the exception, the interpreter prints a stack trace. A source level debugger allows inspection of local and global variables, evaluation of arbitrary expressions, setting breakpoints, stepping through the code a line at a time, and so on. The debugger is written in Python itself, testifying to Python's **introspective** power. On the other hand, often the quickest way to debug a program is to add a few print statements to the source: the fast edit-test-debug cycle makes this simple approach very effective.

Question No.1 — Marks: 2.50

Bookmark ☐

What encourages program modularity and code reuse?

(A) ○ Macro
(B) ◉ **Python (Correct Answer)** (Chosen option)
(C) ○ MYSQL
(D) ○ Office

Question No.2 — Marks: 2.50

Bookmark ☐

Why do programmers choose Python?

(A) ○ stores many data
(B) ○ easy to operate
(C) ○ reusable provision
(D) ◉ **increased productivity (Correct Answer)** (Chosen option)

Question No.3 — Marks: 2.50

Bookmark ☐

Choose the correct meaning for the highlighted word ‘introspective’.

(A) ○ segmental
(B) ○ **self-examining (Correct Answer)**
(C) ○ object-oriented
(D) ◉ exceptional (Chosen option)

Question No.4 — Marks: 2.50
