T.E & SCERT Exam 2023 (CANDIDATE RESPONSE SHEET)

Roll No App No Name

Paper/Subject D.El.Ed(Odia) Exam Date 02 Jun 2023

Exam Slot 2

The questions are based on a short passage. Read the passage below to answer the questions. Choose the correct answer from the four listed choices.

With mounting pollution levels in the capital, the Delhi government has reintroduced the odd-even scheme to combat hazardous levels of smog. While the pollution levels of several cities rose post Diwali celebrations, Delhi has reported some of the worst Air Quality Index ratings in the last few years.

Delhi's odd-even rule has been adopted twice since Chief Minister Arvind Kejriwal's Aam Aadmi Party came to power. It was implemented for 15 days from January 1-15 and April 15-30 last year. The Delhi government hopes that the implementation of the Odd-Even rule will help curb the pollution level.

A Recap of the Rules:

Only odd-numbered cars were allowed on the roads between 8 a.m. and 8 p.m., except on Sundays, and people who violated the rule were fined Rs. 2,000. Special arrangements like extra buses, a bike-taxi service and an increase in the metro frequency were made to make the plan successful.

Volunteers carried placards explaining the rules and also handed out flowers to offenders. Apart from the VIPs, politicians, Supreme Court judges and defence vehicles, single women drivers and women drivers with children below the age of 12 were exempted from the Delhi odd-even rule.

The Odd-Even rule is predicted to aid in 12-15% reduction of pollutants during the implementation phase. Till then it is important to take ample measures to safeguard your health and adhere to these regulations.
